

Norcool Pantry - a functional solution for straight walls

If you do not have any vacant corners in your kitchen, do not despair. Norcool Pantry is an integrated solution for straight walls. Our pantry measures W 1,200 x D 700 mm with a capacity of as much as 1,220 litres – the equivalent of 4 large fridges.

Whole crates of mineral water and serving trays can be placed straight into this model. The door can be hung on either the left or the right. Norcool Pantry can also be supplied as a freestanding unit with a white finish and it can function as a small refrigeration room and be placed in a cellar or laundry room.

The refrigeration unit is a split unit consisting of a cold and a warm part. The cold part is fitted onto the roof of the Pantry and the pipes for the warm part can be fitted up to 10 metres away, for example, in another room.

With a prefabricated refrigeration room, or a unit room, you are guaranteed 100% against damage from damp or condensation when it is installed with an air vent between the existing floor and walls.

Split units must only be installed by an authorised refrigeration engineer.
